

Integrated care of people with complex needs

Thursday 17th November 2005

Registration 9-15am for 9-45 am start until 4-30pm

Dean Park Hotel, Chapel Level, Kirkcaldy, KY2 6QW

The last decade has seen the establishment of community care and increased outreach services for people who require regular physical management. The variety of professional involvement in postural care can lead to duplication or misunderstanding about professional roles. The purpose of this meeting is to highlight the roles of some practitioners in the postural management field and to explore opportunities for improved collaboration. As a starting event for the Scottish Posture and Mobility Network, themes for the day will include:

Complex needs: The carer view - problems & perceptions

An overview of orthotics and integrated care

The role of speech & language therapy, community

occupational therapy, physiotherapy and rehabilitation

engineering,

Rehabilitation medicine : interventions

Afternoon case studies

Exhibition

AGM
