

# Scottish Posture and Mobility Network

## PROGRAMME Innovation in Clinical Practice West Park Conference Centre, Dundee 28<sup>th</sup> Nov. 2007

SPMN's annual meeting is focused on the general theme of innovation in the delivery of posture and mobility techniques, technologies and services for diverse clinical conditions. How can individual practitioners take forward original ideas for posture and mobility devices? What groundbreaking pathways and models of working are emerging? How can the packages of postural care be made sustainable? What training in good practice is accessible? What new products are available? How can collaboration with colleagues in the commercial sector really benefit patients? This year, SPMN's main annual networking event and exhibition is an opportunity to learn about a host of innovations in this field and network with colleagues from multi-disciplinary backgrounds. A poster exhibition is also planned.

(Questions end of each presentation)

Time	Theme	Speaker
9:30 – 10:00	Registration / coffee	
10:00 - 10:05	Welcome / scene setting – The technology perspective of innovation	Luke Meighan
